

Notes for Figure 6H-105(CA)—Typical Application 105(CA)
Lane Shift on Road with Low Traffic Volumes
(Refer to Part 5, Section 5A.01)

Guidance:

- 1. The lanes on either side of the center work space should have a minimum width of 10 feet as measured from the near edge of the channelizing devices to the edge of pavement or the outside edge of paved shoulder.*
- 2. All advance warning signs should be placed so that the path of travel for bicycles is not blocked while maintaining visibility for road users.*

Standard:

- 3. Workers in the roadway shall wear high-visibility safety apparel as described in Section 6D.03.**

Option:

- 4. Flashing warning lights and/or flags may be used to call attention to the advance warning signs.*
- 5. If the closure continues overnight, warning lights may be used on the channelizing devices.*
- 6. A lane width of 9 feet may be used for short-term stationary work on low-volume, low-speed roadways when motor vehicle traffic does not include longer and wider heavy commercial vehicles.*
- 7. A work vehicle displaying high-intensity rotating, flashing, oscillating, or strobe lights may be used instead of the channelizing devices forming the tapers or the high-level warning devices.*
- 8. Vehicle hazard warning signals may be used to supplement high-intensity rotating, flashing, oscillating, or strobe lights.*

Standard:

- 9. Vehicle hazard warning signals shall not be used instead of the vehicle's high-intensity rotating, flashing, oscillating, or strobe lights.**
